Carl is working on getting you the files you need. I'm also having CTS get a backup of all his files if he missed something.

**Subject:** Files on Pavillion

Kelly:

Carl reviewed a number of borehole geophysical logs of production wells at Pavillion. This resulted in a lithologic description of the gas field and several geologic cross-sections, one of which was used in the EPA report.

It is critical that I obtain all this information prior to Carl's departure.

thanks.
